Pro Rural

ANNUAL REPORT 2025-2026

THEMATIC AREAS

1. Skill Development

- Skills to Success (S2S) Quest Alliance.
- Humane World for Animals (HWAI)

2. Rural Livelihood through Agroecology

- Azim Premji Foundation (APF)
- Ashraya Hastha Trust (AHT)
- Bread for the World (BftW)

3. Health

- HCL Tech
- Vitamin Angels

4. Environment

- Dimapur Municipal Council (DMC)
- NGO Networking

5. Education

- Bal Raksha Bharat- Honda Ki Pathshala

6. Farmer Producers Organisation

- NABARD
- NCDC

- Pro Rural Staffs.
- Pro Rural CRPs.
- Networking Partners.
- Acknowledgement

DIRECTOR'S NOTE

BUILDING RESILIENT COMMUNITIES

Short term fixes under poverty reduction initiatives often fail to impact, or become counter-productive. Your intervention may have helped address a community problem, yet a sustained engagement with a theory of change and practice of the change by the community as well as the change agents are required to build resilience and sustainability. My sharing as the Director of PRO RURAL highlights the journey and the learning with the communities in two development blocks, viz; Nsong Circle of Tening Block and Kebai-Khelma circle of Ahthibung block of Peren District during the last one decade (2017-2026).

While addressing the dwindling food sources, water-scarcity and rapid climate crises, Pro Rural, worked alongside traditional farmers to discover viable alternatives among the upland farmers. It began with identifying community leaders, capacitating them and encouraging them as thought-leaders within their own communities. Consultative processes and community feedback were brought to the table for planning where programs are designed and such designs are brought back to the community with relevant inputs, for them to readily accept the package of practices. The bottom-up development plans were encouraged by some donor agencies and small funds for Land preparation, Seed inputs, fencing materials, on-site manure making with garden residues, and pest control with available local herbs and spices were a part of the project design. The assurance of market was made possible with government marketing networks.

Preparatory works included scouting technical support agencies and government line departments that can add value to the entire initiatives. The MOU signed between Pro Rural and the **School of Agriculture Sciences (SAS), Nagaland University, the MOU with Life Mission Learning Centre (LMLC), Naga United and the MOU signed with the Department of Horticulture,** have truly boosted the efforts and constantly providing needed inputs and guidance wherever required. A project support received from the North Eastern Council (NEC), govt of India, has helped with mini trucks and a value-addition factory has also given a fillip to our community development initiatives.

The systematic capacity training for women, youth and the farmers, giving then inputs on site on agribusiness entrepreneurship and the agribusiness value-chain is changing the entire ecosystem in the region. From just two passenger transports running to and from Nsong circle, today we see the entrepreneurial spirit manifested in nearly two-dozen passenger taxis and cargo vehicles. The SHGs that were promoted and facilitated are now managing bulk-sales of harvested crops, managing community seed-banks and becoming efficient in managing inter-loaning processes.

The need remains big, as centuries of living cocooned lives in the confines of their own customs and traditions, and from the confines of their own little village-republic with a grain economy that were self-managed and self-sufficient; now being confronted with modern living standards and ever-changing life-styles with the exposure to money economy of the world, these communities need more awareness to build sustainable livelihoods while maintaining many good practices of their ancient traditions and customs.

Paul Lokho

OUR HISTORY

Pro Rural is a Public Benefit Organization registered under the Societies Registration Act, 1860 with Regn. No. H/RS-6285 dated 12-05-2009. Its operational area is whole of Northeast India. It seeks to realize its vision, *"That all Mankind may have Life in all its Fullness"* through capacity development. Having set its objectives to selflessly render services to the people for their empowerment and development, as well as to harness their capacities for Peace and environment sustainability. The organization has aimed to become a role model in serving the needy sections of the community and the cause of humanity. It focuses on three thematic issues of Empowerment, Employment and Environmental sustainability.

The Pillars of Pro Rural—the 3 Es

EMPLOYMENT

Our first commitment is on devolution of power to the rural communities. This is done through need based systematic awareness training programs for leadership building and improved community participation. The outcome is indicated through the emergence of leaders and popular participation in socio-economic development and the political processes. Agro-based activities are encouraged through skill training, identifying lead-crops and developing farms as well as markets. Small co-operatives and Self-Help Groups are formed to boost productivity. Our principal objective is to make the rural villages into robust republics that can manage their issues, demand their rights and participate in the political processes, and rebuild their livelihoods through developing and enhancing their capacities. We believe true empowerment will also lead to people's initiatives in sustainable peace and ecological development and conservation.

EMPOWERMENT

Pro Rural is aligned to the Global "Youth Employment Summit" (YES) Campaign. It facilitates different training programs to motivate youths to think out of the box and develop employable skills. Entrepreneurship training in one area that is emphasized so that the youth can start with what is already available in their localities. Regular trainings are conducted for youths on enterprise development, business planning and linkages to credit institutions. Constant handholding and monitoring is offered to whoever needed it. Exposure and youth exchange programs is a regular feature which serve as internship period before taking on actual employment.

ENVIRONMENT

The Earth's ecosystem has become more fragile and vulnerable. The terrific pace at which degeneration of the environment is taking place is a matter of grave concern. Putting clearly before the youth for a debate and proposal of action plan has been the most effective means of preservation and promotion. A hundred youth resolving to mobilise a thousand friends for the cause of the life of plants and animals is the type of vision we have built up with youth. Our sensitization strategy includes outreach programs in colleges and universities, youth clubs, church's youth fellowships, leading to more intensive programs and workshops, one to one dialogue and guidance. Experiential learning through exposure tour to development organizations is another important feature

FOCUS AREA

Pro Rural focuses on four main thematic areas-

- **Rural Livelihood:** Cash-crop, agribusiness value-chain, permanent agriculture, livestock development & Management.
- **Skilling Youth:** Training in micro-enterprise development including baking and confectionery, outdoor catering, pickle-making, poultry, piggery, fishery, mushroom production, weaving, jute product manufacturing, basket making, masonry & plumbing, soap and detergent making.
- **Environment and Waste Management:** Promoting kitchen waste composting under the "Garbage to Gold" mission. Plastic waste re-purposing mission, that converts all types of plastics mixed with demolition debris or wasted sands to produce planters, pavement blocks and slabs to cover drains, etc.
- **Healthcare Access:** Health & hygiene awareness, Free Medical camps, ambulance vehicle service to underserved communities.

OFFICE LOCATIONS

1. SKILL DEVELOPMENT

“Skills to Succeed” is a program run by Pro Rural with financial support from QUEST ALLIANCE. It is designed to empower individuals with practical skills, knowledge, and confidence to become self-reliant and future-ready. The program focuses on building both personal and professional capabilities, enabling beneficiaries to explore livelihood opportunities, especially in entrepreneurship and small businesses.

The program includes structured training sessions, hands-on learning activities, mentorship support, and exposure to real-world business practices. Participants are guided in areas such as financial literacy, communication skills, basic digital knowledge, and enterprise development.

POTTERY WORKSHOP

16th February '26, Green Ideathon

SOAP MAKING

13th January '26, Skill Shack

An intense four-day workshop was organized by Quest Alliance for VTI partners from across the Northeast in Guwahati. The workshop brought together representatives from various partner organizations working in skill development and green entrepreneurship.

The Green Convening was held on 6th February in Guwahati, bringing together partner organizations, participants, and stakeholders working towards promoting green and sustainable livelihoods. The event was organized as part of the initiatives led by Quest Alliance to strengthen collaboration among VTI partners in the Northeast.

i) Tsushi-nu (a Success story of 3 Women Breadwinner)

Three talented mothers and homemakers—Tiala, Nukshi, and Alem—launched their catering business after attending a life-changing Pro Rural workshop in October 2025. They named their enterprise ‘Tsushi-nu,’ a word from the Ao dialect that translates to ‘Courageous.’ This powerful name holds deep meaning for the team, as two of the partners are single mothers navigating life's challenges. Their hard work quickly paid off, and within just a month, they proudly served their very first catering order worth Rs. 3,000.

ii) Uncle Takas’ Journey to Success

In July 2025, Temsu attended a specialized training program focused on making both vegetarian and non-vegetarian pickles. This eye-opening experience helped him realize the massive potential in today's food processing market. Moving forward, Pro Rural helped Temsu secure a bank loan to purchase essential machinery. This included an eight-tray dehydrator, a large-scale garlic peeler, and a powder grinding machine. Armed with these new tools, he successfully expanded his business into dehydrated fruits and vegetables. This growth widened his product range and significantly improved his long-term business sustainability.

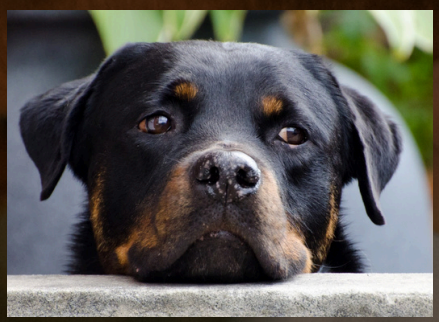

iii) Success story of Mr. Longkhanba Yimchunger

Mr. Longkhanba, a resilient individual with a disability from Prodigals’ Home, attended a pickle-making training program in July 2025. Supported by Quest Alliance and hosted by Pro Rural, this training empowered him to launch his own homemade pickle and snack business. This life-changing opportunity led to the creation of his brand, “The Naga Beans.” Today, he proudly earns his own income and enjoys a newfound sense of independence.

Humane World for Animals

In Nagaland, the HWAI Project is implemented and overseen by Pro Rural organisation. The HWAI team under Pro Rural aim at engaging stakeholders, identifying participants in the animal trade, establishing a project office, and offering livelihood training, with a particular emphasis on marginalized women. The initiative focused on assisting them in transitioning to sustainable livelihood options based on their skills, needs, and available resources.

Mrs. Akashi – Rising with Confidence Through Pickling

Mrs. Akashi, who has a disability in her leg, comes from a challenging background where she often struggled with self-doubt and limited opportunities to earn an independent income. In the month of June 2025, Mrs. Akashi participated in the 'Pickle-Making' training, along with financial literacy, digital literacy, and soft skills program organized by Pro Rural supported by HWAI.

Through guidance and handholding from Pro Rural team, she secured small but consistent orders within her community, steadily building her customer base and earning approximately ₹15,000–₹20,000 per month. Expanding beyond the local market, she now supplies pickles in bulk to Delhi, where they are repackaged and sold, increasing her monthly income to around ₹30,000–₹40,000, while significantly enhancing her market reach.

Ms. Renboni's flavourful journey

As the only daughter in her family, Renbeni carries the heavy responsibility of caring for her sick father. For a long time, she faced this challenge with no stable job, no regular income, and limited skills to support her household. Everything changed after she attended a Pro Rural training program. Armed with new skills, Renbeni began baking cakes, muffins, and buns right from her kitchen.

She started taking home orders for birthdays and local celebrations, quickly earning between ₹6,000 and ₹10,000 each month. To grow her business, she also began supplying small batches of her baked goods to local shopkeepers. This smart move expanded her customer base and boosted her monthly income to an impressive ₹12,000–₹15,000.

2. RURAL LIVELIHOOD THROUGH AGROECOLOGY

Azim Premji Philanthropic Initiatives

The APPI Livelihood Project was launched in the Nsong Area to tackle critical challenges faced by local farmers, including low crop yields, poor market access, and weak support systems. Recognizing that agriculture can uplift rural communities, the project focuses on three main goals:

- **Eco-friendly farming:** Promoting sustainable agricultural practices.
- **Group power:** Building stronger farmer institutions and cooperatives.
- **More ways to earn:** Creating diverse income sources through agribusiness supply chains.

To drive economic growth and secure the local food supply, the project introduces modern farming tools, market-focused production, and community-led initiatives. Today, this impactful program spans 10 villages and lifts up 630 households. It helps them succeed by focusing on high-value cash crops, winter farming, organic practices, better storage infrastructure, and direct links to buyers.

A Morning of Harvest, A Life of Hope: Mrs. Judia – Nsong Village

IIn just 15 minutes of harvesting cucumbers and maize, Ms. Judia earned an impressive ₹1,100. By continuing with weekly harvests, she now brings in nearly ₹8,000 every month. Her income is set to climb even higher; once her king chilli, watermelon, pumpkin, and ginger crops mature, her monthly earnings could jump to between ₹24,000 and ₹32,000. Her success story beautifully highlights how Pro Rural's APPI Project empowers small-scale farmers—especially women—to transform traditional agriculture into a highly profitable, sustainable livelihood.

From 50 kg to 224 kg – Strengthening Livelihoods in Hebamlo Village

In Hebamlo Village, one farmer's success story proves how better farming methods can rapidly increase crop yields and income.

In the beginning, using 50 kilograms of seed brought in only a tiny, unpredictable harvest. It left the family with almost no extra crops to sell for cash. To change this, the farmer joined Pro Rural's training sessions. The classes taught simple, powerful skills like caring for the soil, correct plant spacing, making organic fertilizer, and proper crop care. These handy tips showed the farmer how to get the absolute most out of the exact same plot of land.

When harvest time came, the results were truly incredible. The same 50 kilograms of seed produced a massive 224 kilograms of food! This huge jump proved that the new techniques really work, while giving the farmer a massive boost in confidence.

From Curiosity to Abundance – A Miracle Potato Harvest in Nzauna Village.

In November 2025, a dedicated mother took a small but hopeful step. Guided by her friends, she planted just 5 kilograms of potato seeds on a tiny patch of borrowed land inside a friend's garden.

What followed at harvest time was nothing short of a miracle. She ended up filling two massive bags with fresh potatoes. When she weighed them, the total came to an incredible 85 kilograms! This amazing success completely changed her outlook on farming and what she could achieve on her own.

Today, her confidence is higher than ever. She proudly shares that she is ready to expand her vegetable garden, determined to grow more food for her family and inspire other women in her community to do the same.

Flames of Prosperity: The King Chilli Success Story of Nsong Area

The hills of the Nsong area in Peren District have witnessed an exceptional season this year, marked by a bountiful harvest of King Chilli—one of the region's most treasured crops.

Across 10 villages in the Nsong area, the total production of King Chilli for the year 2025 reached an impressive 1,33,23,070 (units/pods), a remarkable milestone that has left the farming communities both proud and inspired. The scale of this harvest reflects the dedication of farmers and the favourable growing conditions of the region.

Recognizing the immense potential of this produce, Pro Rural is actively working to connect King Chilli farmers to markets beyond Nagaland, including neighbouring states. Furthermore, efforts are underway to explore improved storage, processing, and preservation techniques, such as drying and value addition, so that the chilli can reach wider markets without compromising its quality and flavour.

ACHIEVEMENTS

1	Community leader meetings	18	16 completed
2	Orientation of 25 village leaders	25	25 oriented
3	Community awareness programmes	10	10 conducted
4	Micro household planning	630 HH	Completed up to Phase II
5	CRP training & exposure	10 CRPs	Completed up to Phase II
6	Development of CRPs	10	10 developed
7	Technical inputs	10	9 delivered
8	Household training on cash crops	630 HH	630 trained
9	FPO formation & registration	1 FPO	Registered
10	Crop cluster formation	8	8 formed
11	Vegetable collection house	1	Established
12	Land development	630 plots	Completed
13	Seed distribution	630 HH	Completed
14	Bio-Resource Centre	1	Established (Polyhouse)
15	Baseline survey	1	Completed

Another moving scene was of an elderly woman carefully gathering seeds that had fallen during distribution *"From a small seed a mighty trunk may grow"... When asked why, she said, "Soybean grows really well in my field—I don't want to waste even one." Her respect for each seed showed how meaningful this support truly is.*

A memorable moment when a little girl came forward shyly to collect seeds. When asked who they were for, she replied, *"My mummy is not feeling well, so I came to collect for her."*

Ashraya Hastha Trust is a charitable foundation that advances ideas and supports organisations to promote a better, more equal world. The PRO-RURAL project, supported by Ashraya Hustha Trust, was implemented in the Karbi Khelma Area and Athibung Block, Peren District, Nagaland, to improve the livelihoods of around 460 farming families through sustainable agricultural development.

Achievements

Poly house constructed at Nkio-B village as the centre of 11 villages under Khelma area.

Harvest and Marketing data compilation activities by CRPs. From June 2025 to December 2025 the farmers were busy harvesting and sending to the market through the truck.

Peren, Nagaland

The German organisation **Brot für die Welt (Bread for the World Germany)** primarily operates as a development and relief agency that supports local partners in the Global South. The organization funds over 1,600 partner organisations in approximately 90 countries. In India, Brot für die Welt (Bread for the World Germany) operates primarily by funding and partnering with local non-governmental organizations (NGOs) rather than running its own direct service programs. The organization's work in India focuses on systemic changes and empowering marginalized communities through several themes: Food Security & Nutrition, Sustainable Agriculture, Rural Development and Human Rights & Advocacy.

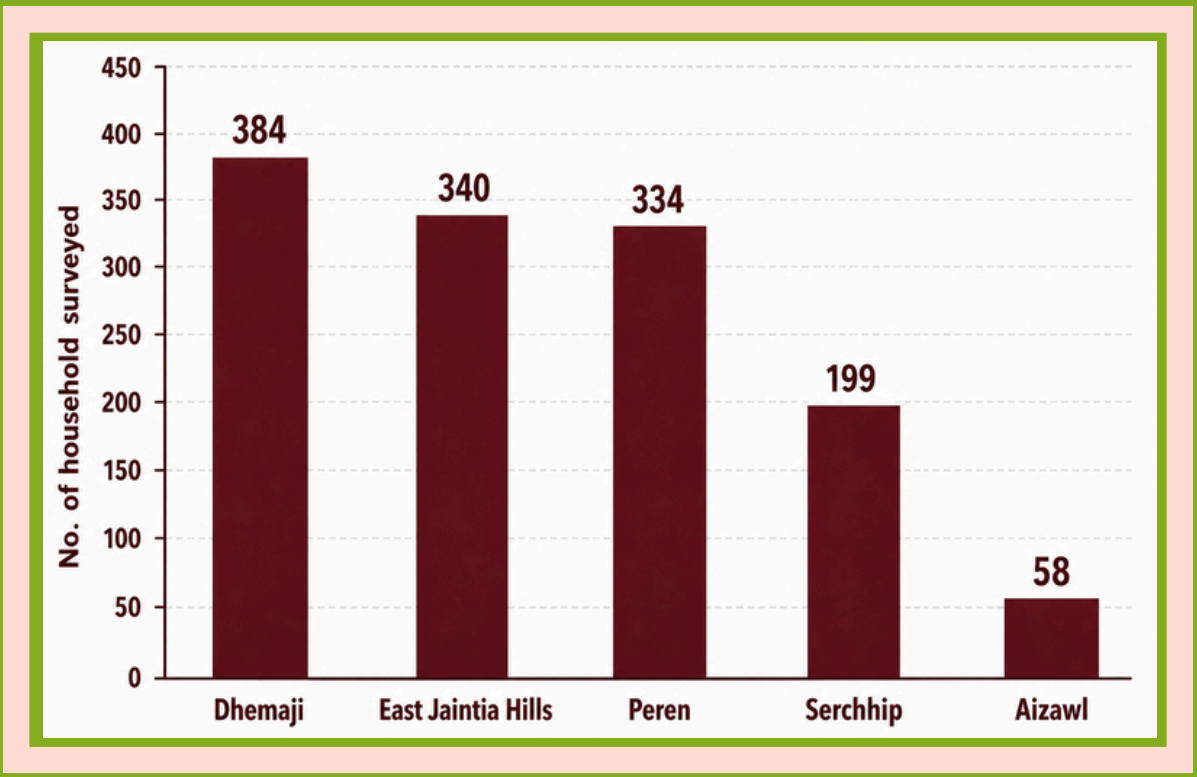

17th to 19th September 2025: Bread for the world Project Team Nagaland along with Director Pro Rural organized a meeting for all the village leaders of Nsong circle to discuss and plan with the registered PO. The purpose was to re-vitalize the PO functioning, by identifying any issues that may be hindering proper functioning, and to plan for addressing them.

The baseline data collection was undertaken over a four-month period, from August to November 2025, covering five target districts across Northeast India. The process was led by Pro Dhemaji Number of Households Surveyed 384 East Jaintia Hills Rural's core field implementation team, comprising 8 internal staff members, 2 trained paid volunteers, and 5 Community Resource Persons (CRPs) from Nagaland, ensuring both contextual familiarity and operational efficiency.

A total of 1,315 households were successfully surveyed, reflecting representation across diverse socio-economic and geographic settings. Data collection schedules were aligned with local agricultural, monsoon, and community calendars to avoid peak cultivation periods and ensure maximum household availability. This timing strategy greatly enhanced response reliability and reduced recall bias.

Stories through the lens

3. HEALTH

The HCL Tech Grant is a major CSR initiative by HCL Foundation, supporting NGOs driving rural transformation in India. It provides grants to each of the winners in Education, Health, and Environment (Water/Biodiversity) fostering sustainable socio-economic development. Similarly, out of 13,925 registrations from NGOs across India, Pro rural got first runners-up in its 10th edition. HCL Foundation support the remarkable organizations, empowering them to expand their impact and create lasting change. PRO RURAL, with a series of Free Medical Camps and Health Awareness Activities were conducted between June 2025 and February 2026. The initiative focused on providing curative healthcare services, health education, and capacity building to improve community health and encourage preventive practices.

Free Medical Checkup

Health Awareness Training

Free Medical Checkup

Hand Washing Training

Vitamin A Supplementation (VAS) is a proven, cost-effective intervention that not only protects children under five preventable blindness and infections, but also supports their cognitive and physical development. Since 2016, Vitamin Angels has been supporting the Government of Nagaland in improving VAS coverage by providing vitamin A supplements across the state. In 2022, this collaboration was further strengthened through a Memorandum of Understanding under which Vitamin Angels began providing technical assistance to improve supply chain management and service delivery, generate community-level demand, and strengthen data systems.

Mission 9 by 5: Reaching every child with 9 doses of Vitamin A by 5 years

Mission 9 by 5, a demonstration pilot rooted in implementation science principles, is a result of this shared vision. The initiative aims to strengthen existing systems and deepen community engagement to improve VAS coverage among children under five in selected blocks of Nagaland. Through this pilot, interventions are being co-developed with National Health Mission (NHM) Nagaland, and tested to improve both service delivery and caregiver awareness with the goal of enabling future integration and scale up across the state.

Sustainability and Future Engagement

Moving forward, the program will continue to strengthen community engagement and frontline worker capacity. Future activities may include expanding community awareness initiatives, scaling up successful prototype interventions strengthening routine supervision, and monitoring of under-5-line list data from pilot areas so as to improve Vitamin A awareness. Continued collaboration with government departments and community institutions will remain essential to sustain the gains achieved during the implementation period.

Strategy & Key Interventions

- **Supply Chain Strengthening**
- **Service delivery enhancement**
- **Reporting & MIS improvement**
- **Community awareness & demand generation**

ACTIVITY HIGHLIGHTS

Environment being one of the focused area, Pro Rural promotes eco clubs in various schools and colleges through activities like seminars, workshops, cleanliness drives, sustainable kitchen waste practices, etc. These activities encourages the students and the communities to develop environmental empathy, passions for environmental sustainability. Pro Rural has also partnered with Dimapur Municipal Council, Village Councils, key stakeholders in the society for the promotion of sound and healthy environmental-friendly behaviors.

6. FARMER PRODUCERS ORGANISATION

The Nsong Village Integrated Multipurpose Cooperative Society Ltd. (FPO) was established in 2023 to strengthen the livelihoods of farmers across 10 villages in the Nsong area under Tening Block, Peren District, Nagaland. The FPO was formed with the vision of promoting collective farming, improving agricultural productivity, and enhancing income opportunities for rural households. The member villages include: Hebamlo, Old Ngaulong, Ngaulong Lodi, Ngam, Nzauna, Lalong, Nchan, Nsong, Namchi, and Nsong Town.

North Eastern Region – National Cooperative Development Corporation (NCDC)

Convergence Initiative with Pro Rural NGO, Dimapur Nagaland.

Under the Govt. of India initiative, 10,000 FPOs are formed and registered country-wide. The National Cooperative Development Corporation (NCDC) has been entrusted with implementation of the scheme. The four FPOs registered in Peren District are entrusted to Pro Rural as their CBBO. Pro Rural is supervising and facilitating the FPO in business plan development, program implementation to ensure progress of their business. CBBO training and exposure are conducted for the CEOs, Accountants, and the BODs on a regular basis. Portal based progress reporting are also conducted and ensured. The FPO shareholder mobilization is also undertaken by Pro Rural team to improve the overall performance of the FPOs.

Mrs. Amaile Pame is an active member of the Nsong Village Integrated Multipurpose Cooperative Society Ltd. (FPO). To strengthen her livelihood, she received two piglets under the FPO's livestock support initiative. Today, Mrs. Amaile Pame owns three healthy pigs, significantly increasing her household assets and creating opportunities for additional income through pig rearing.
